Emergency stop  
Automatic Over load brake switch  
Strong heat-treated aluminium  
And much more

*Solar Hot Water Systems*

*Air-conditioning*

*Roller Doors*

The All Purpose lifter has been designed to meet the ever increasing materials handling needs in many different trades which includes Air-conditioning, Garage door, Ceiling, Solar, Plumbing and General maintenance installation and service.

Its Light and Compact design means that access to a lifting partner need not be too complicated nor a hassle. The portable lifter fits into the boot of a car and can be carried from job to job via the bags it comes in, it can also be operated in confined spaces with or without power.

Specifically designed extension arms have been designed to fit the existing tray top and can now be purchased to help in the transferral of Solar Hot water systems from the lifter to the roof of homes or to install Garage doors. This means getting away from carrying heavy objects up ladders, on shoulders or having to use other time consuming or hazardous methods. The portable lifter comes with a 12 month parts and labour warranty.
